Reel House Website for Dummies

Jobs Page Edition · The Axis · COS10011/COS60004/COS60007

No experience needed. If you can copy, paste and press Save, you can look after the Jobs page.

1. What is in our folder?

Think of the website as a small shop. Each file is one room.

File	What it is	Plain English
`index.html`	Home page	The shop front
`apply.html`	About page	Who we are
`jobs.html`	Jobs page	The job noticeboard
`contact.html`	Application form page	The desk where people apply
`reelhouse.css`	Style sheet	The paint and furniture for every page
`reelhouse-search.js`	Search helper	The little assistant behind the search box
`images/` folder	Pictures	Put `group.jpg` here

Golden rule: keep all these files together in one folder. If one wanders off, pages lose their colours or links break.

2. How do I see the website?

1. Open the folder.
2. Double-click `index.html`. It opens in your browser.
3. Click **Jobs** in the menu.

That is it. No internet and no special program needed.

3. How is a web page made? (30-second version)

Layer	Language	Think of it as
Words and structure	HTML	The skeleton and the text
Looks	CSS	Clothes and make-up
Tricks	JavaScript	A helper (only our search box uses it)

When you edit a job, you only touch the **HTML**. You never need to touch CSS.

4. Tag cheat sheet for the Jobs page

Tags are labels in angle brackets. Most come in pairs: an opening tag and a closing tag with a slash.

You see	It means	On the page
`<h1>`	Biggest heading	"Join the team behind the reel."
`<h2>`	Big heading	A job title
`<h3>`, `<h4>`	Smaller headings	"Key responsibilities", "Essential"
`<p>`	Paragraph	Normal text
`<section>`	A block of the page	One whole job
`<ol>` and `<li>`	Numbered list	Responsibilities (1, 2, 3…)
`<ul>` and `<li>`	Bullet list	Requirements
`<dl>`, `<dt>`, `<dd>`	Label and value pairs	"Salary" and "VND 15,000,000…"
`<aside>`	Side box	The yellow "How to apply" box
`<a href="...">`	A link	The Apply buttons

5. Easy recipes

Before you start

- Open `jobs.html` in a text editor such as VS Code or Notepad.
- Use **Ctrl+F** to find the text you want to change.
- After editing, press **Ctrl+S** to save.
- Go to the browser tab and press **F5** to refresh.

Recipe A: Change a salary

1. Press Ctrl+F and search for `per month`.
2. Change only the numbers. Do not delete the `<dd>` and `</dd>` around them.
3. Save and refresh.

Recipe B: Add one more bullet to Requirements

1. Find a line like `<li>Basic colour grading</li>`.
2. Copy the whole line and paste it right below.
3. Change the words between `<li>` and `</li>`.

Recipe C: Change the deadline

1. Search for `Applications close`.
2. Change the visible date, for example `30 November 2026`.
3. Also change the code part `datetime="2026-11-30"` to the same date in year-month-day order.

Recipe D: Add a whole new job

1. Pick a code: **exactly 5 letters or numbers**, for example `DES24`.
2. Find the whole block that starts with `<section class="job"` and ends with `</section>`. Copy it all.
3. Paste it directly after the last job block.
4. Replace the old code with your new code in these places:
   - `id="..."` on the section
   - the pink `Ref:` label

- the "Reference number" row
- the small `id` and `aria-labelledby` names (for example `des24-title`)

5. Change the title, description, salary, boss, duties and requirements.
6. Near the top of the page, copy one line inside `<ul class="job-links">`, paste it, and change its `#VID24` and text to your code.
7. Save, refresh, and click your new quick link to test it.

6. The 5-character rule

The application form only accepts a job code with exactly 5 letters or numbers.

Code	OK?	Why
`VID24`	Yes	5 characters
`ADS24`	Yes	5 characters
`VID-24`	No	Dash is not allowed
`VID2`	No	Only 4 characters
`VIDEO24`	No	7 characters

7. Oops! Something looks wrong

What you see	Likely cause	Fix
No colours, plain text	CSS file missing or renamed	Put `reelhouse.css` in the same folder, with that exact name
Search box does nothing	JS file missing	Put `reelhouse-search.js` in the same folder
Whole page looks broken after editing	A closing tag was deleted	Undo with Ctrl+Z and try again more carefully
Job title has a blue background	`<header>` has no `class="job-head"`	Add the class back

What you see	Likely cause	Fix
Group photo is a pink box	No picture file	Add `images/group.jpg`
Menu link opens a blank page	Target file is missing	Check the file name, About is `apply.html`

Beginner tip: before a big edit, copy the whole folder as a backup.

8. Before you hand in

- [ ] Each job has a code, title, short description, salary, boss, duties, essential and preferable requirements.
- [ ] Every job code is exactly 5 letters or numbers and no two are the same.
- [ ] The page has at least two heading levels, several sections, one numbered list, one bullet list and one `<aside>`.
- [ ] Every page menu has a working Jobs link.
- [ ] You tried the page on a narrow window (like a phone) and in dark mode.
- [ ] You checked the code with the W3C validator at validator.w3.org.

9. Mini glossary

Word	Meaning
HTML	The language that holds the words and structure of a page
CSS	The language that makes it look nice
Tag	A label like `<p>` that tells the browser what something is
Class	A name on a tag so CSS knows how to style it
ID	A unique name on one tag, used for links that jump to it
Browser	Chrome, Edge, Firefox, Safari: the program that shows web pages

Word	Meaning
Validator	A free tool that checks your HTML for mistakes
